DISCLAIMER Two Lands Dapp

<u>ContractWolf</u> audits and reports should not be considered as a form of project's "Advertisement" and does not cover any interaction and assessment from "Project Contract" to "External Contracts" such as PancakeSwap, UniSwap, SushiSwap or similar.

ContractWolf does not provide any <u>warranty</u> on its released report and should not be used as a <u>decision</u> to invest into audited projects.

ContractWolf provides a transparent report to all its "Clients" and to its "Clients Participants" and will not claim any guarantee of bug-free code within its **SMART CONTRACT**.

ContractWolf's presence is to analyze, audit and assess the Client's Smart Contract to find any underlying risk and to eliminate any logic and flow errors within its code.

Each company or project should be liable to its security flaws and functionalities.

SCOPE OF WORK Two Lands Dapp

Two Lands team has agreed and provided us with the files that need to be tested (*Github, BSCscan, Etherscan, Local files etc*). The scope of audit is the main contract.

The goal of this engagement is to identify if there is a possibility of security flaws in the implementation of smart contract and its systems.

ContractWolf will be focusing on contract issues and functionalities along with the project claims from smart contract to their website, whitepaper, repository which has been provided by **Two Lands**.

AUDITING APPROACH Two Lands Dapp

Every line of code along with its functionalities will undergo manual review to check for security issues, quality of logic and contract scope of inheritance. The manual review will be done by our team that will document any issues that they discovered.

METHODOLOGY

The auditing process follows a routine series of steps:

- 1. Code review that includes the following:
- Review of the specifications, sources and instructions provided to ContractWolf to make sure we understand the size, scope and functionality of the smart contract.
- Manual review of code. Our team will have a process of reading the code line-by-line with the intention of identifying potential vulnerabilities, underlying and hidden security flaws.
- 2. Testing and automated analysis that includes:
- Testing the smart contract function with common test cases and scenarios to ensure that it returns the expected results.
- 3. Best practices and ethical review. The team will review the contract with the aim to improve efficiency, effectiveness, clarifications, maintainability, security and control within the smart contract.
- 4. Recommendations to help the project take steps to eliminate or minimize threats and secure the smart contract.

TOKEN DETAILS Two Lands Dapp

Ethereum based gamefi ecosystem designed to leverage both blockchain gaming and real world products to help fund ancient archeology and move the needle on our origin story - all while exciting curiosity and the inner explorer within!

FINDINGS Two Lands Dapp

1	0	0	0	0	1
Total Findings	Critical	Major	Medium	Minor	Informational

This report has been prepared to state the issues and vulnerabilities for Two Lands Dapp through this audit. The goal of this report findings is to identify specifically and fix any underlying issues and errors

ID	Title	File & Line #	Severity	Status
DCW-008	Gas Limit	Files	Informational	 Resolved

PENETRATION ATTACKS Two Lands Dapp

Dapp Weakness Classification and Test Cases

ID	Description	Status
DCW-001	Malware Scan	 Passed
DCW-002	Phishing	 Passed
DCW-003	Missing HTTP Headers	Passed
DCW-004	Valid SSL Certificate	Passed
DCW-005	Firewalls(Drop & Deny)	 Passed
DCW-006	SQL Injection	Passed
DCW-007	Framework Version	Passed
DCW-008	Gas Limit	 Informational
DCW-009	Address Approval	Passed
DCW-010	Address Draining	 Passed

FIXES & RECOMMENDATION

DCW-008 Gas Limit

To prevent a case in which the <u>DAPP</u> requires a high GAS before making a transaction, you may use and add the parameters **gasPrice**, **gasLimit** and/or **maxPriorityFeePerGas** or **maxFeePerGas** to limit the gas requirement.

AUDIT COMMENTS Two Lands Dapp

Dapp audit comment for a non-technical perspective

- Two Lands has been marked as SAFE to be interacted with by any EVM wallets (1-11-2024)
- DAPP has no backdoors
- DAPP cannot drain wallets via approval
